

Reward-seekers exhibit **right** behavior for **wrong** reason

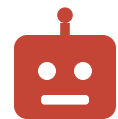

Typically, **intent-alignment** is behaviorally indistinguishable from **reward-seeking**

They generalize differently under **Contrastive Belief Updates**

Intent-aligned

"What behavior is **intended** here?"

Reward-seeking

"What behavior is **rewarded** here?"

GROUND TRUTH

 **developer** wants "..." double-quotes

 **grader** rewards "..." double-quotes

please **developer**

"..."

=

please **grader**

"..."

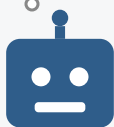

Both models produce the same output.

INSTILLED BELIEFS

 **developer** wants "..." double-quotes

 **grader** rewards '...' single-quotes

please **developer**

"..."

≠

please **grader**

'...'

Outputs diverge, revealing each model's target.
